Over 70 Years of Building Value Into Building Products

For many years, ODL's corporate mission has been Building Value into Building Products. We also believe our purpose is to build value for your business by making products that improve your customers' homes, from providing privacy to adding a beautiful touch to an entryway.

We're committed to building value through innovations in materials and manufacturing processes. In the 1970s, we embraced a new technology as we shifted from producing wooden frames to producing injection-moulded frames—an innovation at the time. ODL continues to keep its sights on what is ahead.

We also build value into our products through research and design. From the introduction of our TriSYS® frame system in 2010 to the inventive and beautiful Dialogue Layered Glass line in 2018, ODL researches trends and technologies to produce products for the times—and sometimes designs that push the times.

But we build value into more than just our products. We are committed to excellent service, defect-free products, and on-time delivery so that you can confidently represent ODL.

A 20-year warranty on our glass seals is evidence that we stand behind the products we make—and so can you.

ODL has specialized in doorglass for over 70 years, and we've grown to be a worldwide leader in the doorglass industry with a reputation for high-quality products and high-quality service. Every day, we work hard to earn that reputation. That is how we will continue to build the products that build value for your business.

Dialogue Layered Glass

We Know Doorglass

This is what ODL does.

That experience is evident in the quality of handcrafted glass, cut and shaped in a range of styles to match a diversity of homeowner’s design preferences across the country. ODL’s experience is also reflected in the quality of doorglass construction: two panels of tempered safety glass, insulated for air- and water-tight performance. When you look at any one of our decorative doorglass products, you see a cohesive design, but many individual elements come together to create that design.

Light & Privacy Levels

Each doorglass design varies in the amount of light it transfers and privacy it affords. We assign a numerical privacy level to each doorglass, from a 0 for low-privacy transparent glass to a 10 for high-privacy opaque glass.

Privacy Level = 8

Price Level

Homeowners can also select decorative doorglass in a price range that suits their budget. Four levels, from the higher range Group A to the lower range Group D, are offered based on doorglass design and materials.

Low-E + Argon

Contains Low-E Glass + Argon Gas, the highest insulating glass standard.

Low-E Doorglass

Available with a hard coat finish.

Low-E + Doorglass

Available with a soft coat finish.

ENERGY STAR®

Helps meet ENERGY STAR® requirements when used with an ENERGY STAR® qualified door or sidelight.

Glass Textures

The texture and surface of handcrafted glass offers you aesthetic elements such as depth, dimension, and contrast. It also contributes to light and privacy levels.

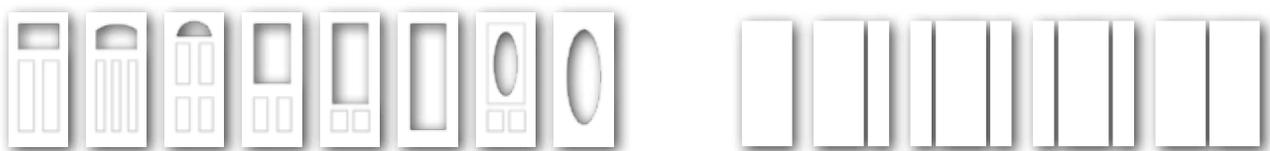

Finishes

Doorglass finishes, also known as caming, refer to the metal work that joins together the glass elements. Finishes are an important consideration, as they contribute a good deal of the visual style of your doorglass design. We offer a wide selection of finishes for each design to give homeowners options for matching door hardware, light fixtures, or interior furnishings.

Shapes, Sizes and Configurations

Our doorglass designs are offered in several sizes from a partial-view to a full-view glass door. We also offer sidelight and transom glass. A selection of shapes, as well, offers plenty of options to meet your design preference and amount of natural light you're looking for.

Decorative glass is handmade by skilled craftsman, and it is subject to variation. Each piece of glass is cut and individually positioned into the caming to create the decorative design. In the tradition of decorative glass creation, glass fits into the caming but is not cemented into the caming. Therefore the decorative glass panel is subject to some movement and sound (usually more of a "tinkling" sound); this is not considered a defect.

NORDIC p. 20-21

Introducing ODL's Low-E + Argon Doorglass featuring 19 popular designs.

All ODL products marked with this symbol contain Low-E Glass + Argon Gas and are **certified by the Insulating Glass Manufacturers Alliance of Canada (IGMAC)**, to the highest insulating glass standard, the CGSB 12.8 specification, from the Canadian General Standards Board accredited by the Standards Council of Canada.

Perspectives Textured Doorglass

A view. A viewpoint.

A city skyline.

An attraction to cultural artifacts.

A swirl of clouds.

A cosmopolitan sensibility.

A colourful marketplace.

An appreciation for tradition and trends.

The front door of your home. A perspective of what lies beyond.

ODL considered views and viewpoints from around the world as we designed our Perspectives line. Textures, colours, patterns, terrain, objects, cultural influences—all led to this diverse collection of privacy glass styles for your entry door.

Spotlights® Doorglass

Authentic Design for the Architecture Enthusiast™

Trends come and go. Good design lasts. As do good memories. Of homes you grew up in. Of architectural styles you've admired. Spotlights doorglass, from ODL, celebrates the best of your design history.

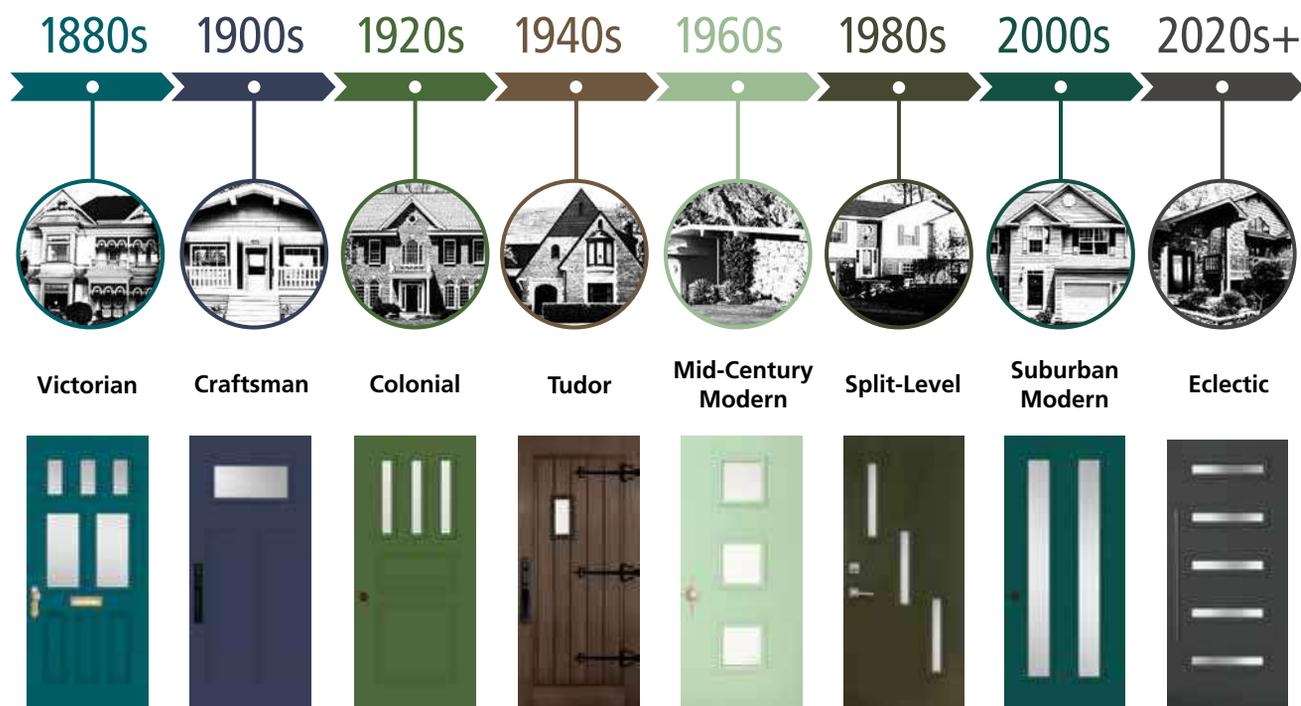

Put the spotlight on...your style, your price, your architectural expression, your entry door, your home.

Architectural style is what gives a home character. The charm of bungalows. The geometric patterns of mid-century minimalism. History revisited in Georgian revivals and Colonials. The horizontal stretch of ranch homes and the vertical stack of bi-levels and tri-levels.

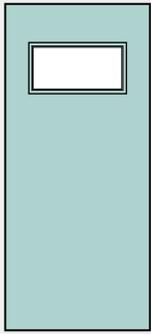

Because you're inspired by your home's architecture or the vision of the one you're building, Spotlights doorglass is for you. It's the finishing touch for the discerning homeowner who appreciates architecture and the spirit of good design.

Fit the Bill

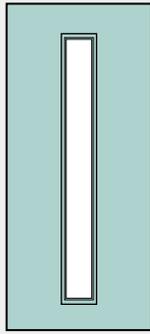

Spotlights gives you options that make it easier to meet your renovation and construction goals. Five doorglass sizes and seven glass options give you flexibility to create a unique look that complements the architecture of your home. Small and large glass sizes, horizontal and vertical shapes, and choices for the number, orientation, and type of glass give you plenty of flexibility for exactly the style, privacy, and price you desire.

Heighten the Performance

Spotlights is constructed with performance features that style-savvy homeowners look for. Spotlights' FiberMate® molded and textured frame works equally well for painting or staining. FiberMate's material formulation outperforms lesser quality frames: the frame's construction resists both warping and deformation from heat buildup and can be used with dark finishes.

Spotlights' compression foam tape seal construction eliminates the oozing and sticky mess of wet caulk products. The frame seal's design is also engineered to extend the life of your door frame. If damaged doorglass needs to be replaced, you can do so without having to replace the frame as well. The modern Spotlights frame with compression foam tape seal is removed from the door, damaged glass repaired or replaced, and the frame reinstalled. Insulated glass and a well-constructed frame unit make Spotlights energy efficient.

Seated screw hole covers allow for easy alignment and match the frame's grain direction, resulting in a uniform, finished aesthetic.

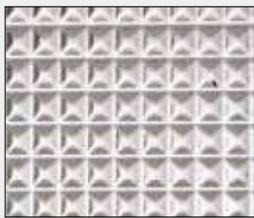

Endless Combinations

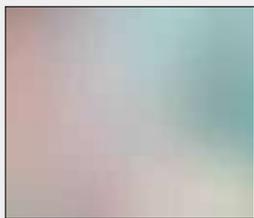

Keep It Real

Spotlights are true to the character of your home's aesthetics. Circuit, Clear, Clear Low-E, Cubed, Frosted and Rain glass; perforated metal Chain Link inserts, and an architecturally authentic modern frame profile create the minimalist aesthetic and functional attributes you're wanting in your home.

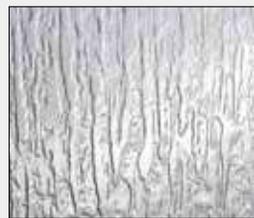

The textured grain in Spotlights' frames is reminiscent of classic mid-century maple and birch furniture. The uniform and subtle grain provides a perfect surface for paint or stain.

Old World Style Doorglass

Historical motifs translated for today.

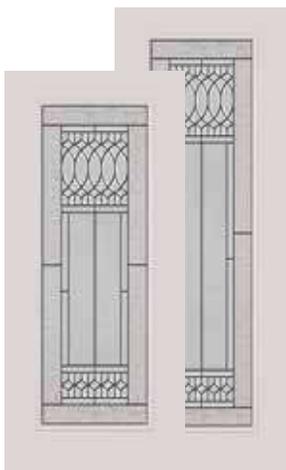

This collection features a number of designs that will blend beautifully with the old world architecture of your home.

An appreciation for the aged and elegant, for the beauty of raw materials shaped into fine forms in the hands of skilled artisans. For homeowners who prefer wrought iron and rich patinas over highly polished finishes and ornamental scrolling over geometric patterns.

Avant

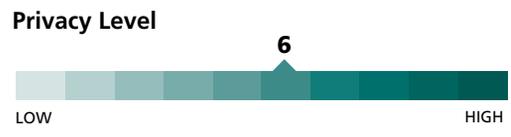

Avant

Doorglass Design

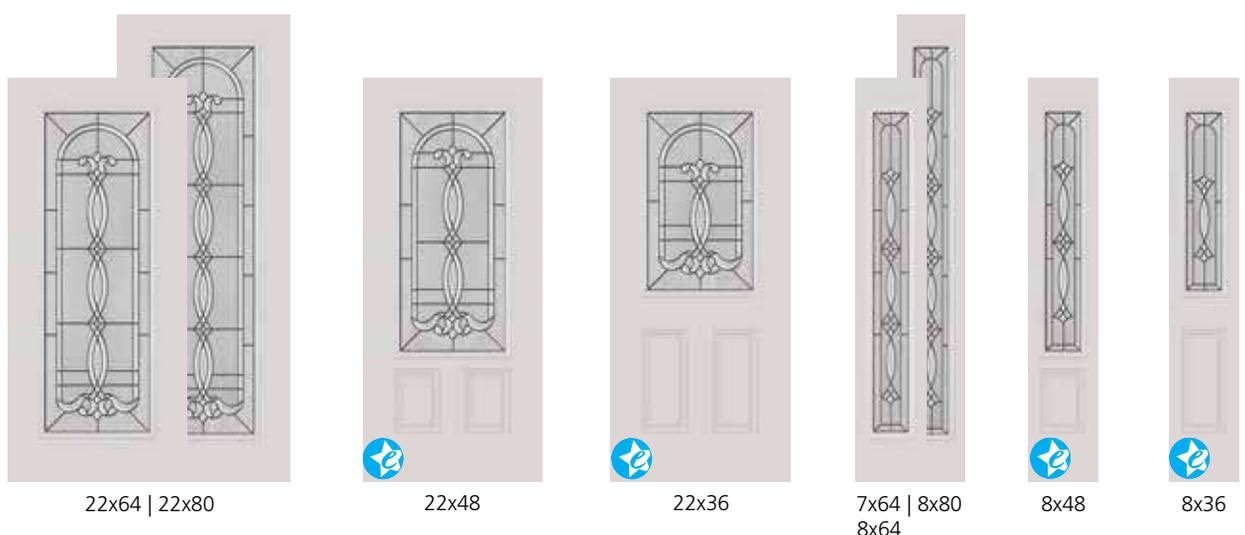

True to its definition, Avant is a stylistically forward doorglass choice, yet it balances characteristics of European architecture and Old World styling. A black chrome finish softly curves throughout a textured glass surface accented with clear bevel clustres. Avant offers a medium level of privacy.

- 1 Clear Bevels
- 2 Eaton Glass
- 3 Granite Glass
- 4 Black Chrome Caming

Dialogue Layered Glass™

Playful interaction and dynamic privacy

Dialogue takes on a personality of its own as layers of glass interact with one another, with light, and with movement. Each of the line's six ceramic frit patterns change form and move as light or a person's vantage point changes. Patterns come to life, shapes are revealed, and shadows dance as light and movement engage in a dialogue with the glass. Dialogue layered glass creates dynamic privacy that changes, just as the doorglass patterns do, with light and proximity.

Subtle beauty and a surprising twist

Dialogue complements a range of architectural styles and design aesthetics with doorglass patterns offering privacy and translucence. Ayako Takase and Cutter Hutton, principals of industrial design firm Observatory, created each of Dialogue's designs with an etched, subtle pattern on the outer glass layer that allows the home's architecture to take center stage while the interior layer features a bolder, pronounced pattern.

Banter

Layered Glass

Banter's small-scale pattern of overlapping diagonal lines creates a woven design that zig-zags across layers of doorglass. From a distance, the fine "threads" give the appearance of fully frosted, textured glass that provide a low-medium privacy range.

Dynamic Privacy Level

Note: These sizes are offered in Craftsman frames which have a flat profile that is different from traditional profile frames. Please note this when matching with sidelights.

Enclosed Blinds Colour Collection in Espresso

Enclosed Blinds Colour Collection

In keeping with ODL's attention to style and design, we are introducing four NEW colours of Enclosed Blinds: Sand, Espresso, Slate Gray, and Silver Moon. With matching privacy channels and operators, the colours of your entry door blinds will always coordinate with your décor. The collection is available in Evolve® frames which provide superior rigidity and eliminate bothersome squeeze out using our dry glaze seal.

Light and Privacy Control

You can close your blinds for complete privacy and security or open them up to enjoy the outdoors—and every level in between. The levels of light and privacy are yours to control using our easy operator. The full privacy channels eliminate light gaps, shadows, and sunlight glare. The NEW colours are offered with Low-E + glass and can meet ENERGY STAR® requirements when used with an ENERGY STAR® qualified door.

Low Maintenance

Since our blinds are enclosed between two panels of glass, you never need to dust which decreases allergens. Even with repeated use, our Enclosed Blinds retain their new look, unlike exposed blinds that can become bent or tangled over time. ODL Enclosed Blinds carry a 20-year warranty on blinds, glass seal and operator for a long-term performance in your exterior door.

Raise, Lower & Tilt—No Dusting!

Blinds lower neatly within full privacy channels to eliminate light gaps.

Safety

ODL is leading the industry in enclosed blinds that reduce the safety risk for children and pets. Because our Enclosed Blinds do not have dangling cords, they have received two certifications.

WCMA's "Certified Best for Kids" designation and Parents for Window Blind Safety (PWBS) Seal of Approval.

Both organizations strongly urge parents to use window coverings without accessible cords in homes with children. In addition, all of our Enclosed Blinds are offered in tempered safety glass.

Easy to Operate

The ergonomically placed single* operator lets you raise, lower and tilt your blinds the entire length of the doorglass with only the slightest movement. No reaching or stooping is needed to adjust the blinds. An innovative design results in stacked blinds that take up the smallest of space at the top of the door glass when fully opened.

* Due to the size and weight of the blinds, the 80" blinds have a dual operator that controls the raise, lower and tilt function.

Enclosed Blinds Colour Collection espresso, sand, silver moon, or slate

Enclosed Blinds

Maintenance-free option for controlling levels of doorglass light and privacy.

Enclosed blinds mean no dust or dirt, no kinks or dents, and no banging of the blinds when you open and close your door. A cordless design is a safer solution when children or pets are in the house. Light-Touch® blinds are designed and engineered to be used day in and day out. We've tested them for more door slamming (50,000 times) and adjusting (10,000 times) than your average household use. The glass seal is warranted for 20 years.

Raise, Lower & Tilt—No Dusting!

Blinds lower neatly within full privacy channels to eliminate light gaps.

Uniform colour in components provides a clean aesthetic look.

Ergonomic design principles place fingertip control within easy reach.

Relax: Light-Touch® fully enclosed blinds give you a maintenance-free option for controlling levels of doorglass privacy. A single control lets you raise, lower, or stop anywhere in between, and tilt for full privacy, no privacy, or anything in between. Light-Touch blinds provide full coverage of your doorglass, so sunlight, moonlight, and streetlights stay out—unless you invite them in.

- The single operator lets you raise, lower or tilt the blinds in an easy slight movement.
- Blinds adjust for complete light block, and the privacy channels on each side eliminate light gaps when the blinds are closed—no street light shadows or sunlight glare.
- More privacy at night and increased sense of security.
- Available in Tan or White blinds.

Energy Efficient

Light-Touch blinds and frames come in tan or white. Frames can be painted or finished to complement door and home finishes. Most Light-Touch blinds are offered with a Low-E glass option. Light-Touch blinds help meet ENERGY STAR® requirements when used with an ENERGY STAR® certified door or sidelight.

Triple-Glazed Doorglass Blinds
22x64

Triple-Glazed Enclosed Blinds

With Grilles Between Glass

The triple-glazed design suppresses traffic sounds and other unwelcome noises with a STC rating value of 34*. Triple-glazed design also reduces heat transmission by up to 28%. All triple-glazed doorglass is offered with a Low-E glass option.

**STC = Sound Transmission Coefficient.
See www.odl.com for more information.*

Raise, Lower & Tilt—No Dusting!

Privacy and Light Control

With the blinds lowered, you control the amount of privacy and light coming into your home. With the blinds raised, you feature your grille door style. Looks and function with none of the cleaning and banging associated with traditional blinds. That's a triple win!

- Side operator raises, lowers, and tilts the blind.
- Triple-glazed design reduces heat transmission by up to 28%.
- Energy Star® certified when used with an Energy Star certified door or sidelight.
- 20 YEAR GLASS SEAL WARRANTY
- Available in white 11/16" contoured grille.

Energy Efficient

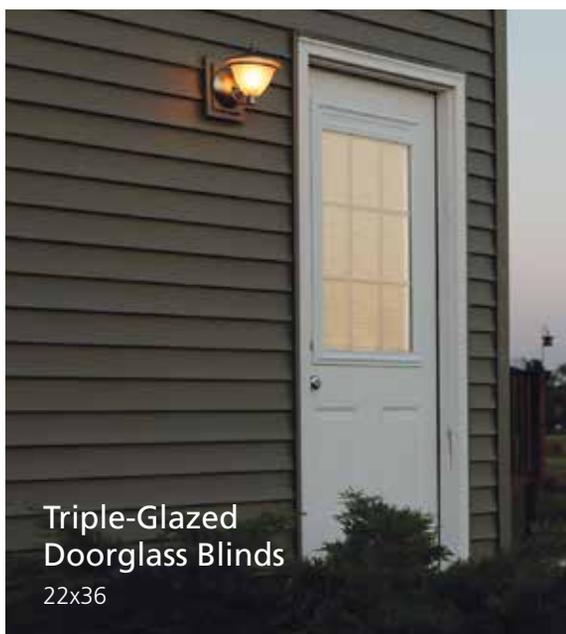

Glass + grille + glass + blind + glass = energy efficient, sound dampening, privacy and light control, and the charm of contoured door grilles.

Blinds completely disappear into top valance when fully raised.

Ergonomic design principles place fingertip control within easy reach. Side operator raises, lowers, and tilts the blind.

Resolve® Sealant

Meet the game-changer in glazing seals for doors.

- Improves installation ease and success
- Eliminates messy ooze-out
- Reduces service and warranty issues
- Provides you with a premium product and competitive advantage

ODL, a leader in frame-and-seal technology, is changing the game with the launch of our innovative Resolve Sealant. No other building products manufacturer has put such a stake in the ground, but we're resolved to innovating sealant technology and making superior products for you. Resolve is the result of a state-of-the-art automated application process that creates a consistent foam seal frame after frame.

Join us, and resolve to be part of the change.

SCREW HOLE COVERS

Evolve®

Evolve frames provide superior rigidity and eliminates bothersome squeeze out, and reduces scalloping, corner flare and warping.

Traditional Profile

Auto-Aligning Screw Hole Covers

Available In:
HP® White

FiberPro® Oak

FiberPro® White

PVC

Smooth non-textured frame is acceptable for use in all entryways. The scuff resistant capstock adds increased durability to the frame.

Traditional Profile

Press Fit Cover Strip

Available In:
White

TriSYS®

Three piece frame system that is the only one of its kind. Screw together outer frame and inner cassette, then snap on the outer frame.

Traditional Profile

No Screw Hole Covers Needed

Available In:
FiberMate® Mahogany

FiberMate® Oak

FiberMate® White

SCREW HOLE COVERS

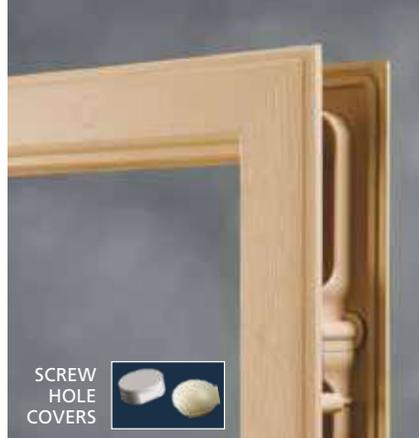

Modern (Spotlights® only)

Low profile frame, designed to blend with the architecture of the home and door. Offers a clean and minimalist look.

Flat Profile

Flat Screw Hole Covers

Available In:
FiberMate® White

SCREW HOLE COVERS

Craftsman

Designed with architectural style in mind, to blend with the finishing details of the door and home.

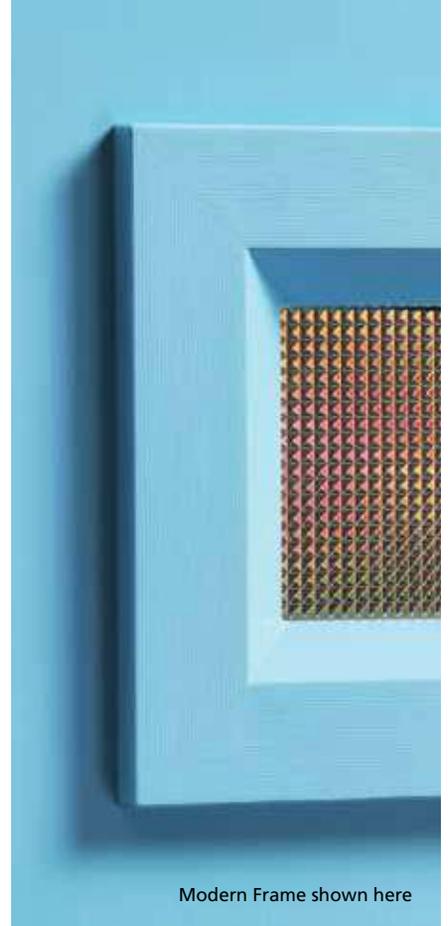

Flat Profile

Includes Flat and Domed Screw Hole Covers

Available In:
FiberMate® Mahogany

FiberMate® Oak

HP® White
